

**SOME INTERESTING FACTS
AND COMPANY HISTORY**

**PROVEN
PERFORMANCE!**

Since 1988 Precision Sharpening Devices, Inc. has been manufacturing counter grinding / back beveling equipment for the knived Industries, mostly for the pulp and paper, sawmill, plywood, and whole tree chipping markets. With thousands of sharpeners on the market and on several continents, we have satisfied many customers cost saving needs as well as increasing their production.

The counter grinding / back beveling process is very simple. The knife is re-sharpened while remaining in the machine two to three times. The counter ground / back beveled edge is a more effective chipping edge while under normal as well as adverse conditions.

Remember, sharp knives = top quality chips, less wear and tear on equipment, easier maintenance, less fuel consumption, a safer operator environment, decreased costs, and increased production.

CHIPPER KNIFE SHARPENERS

**INTRODUCING THE NEXT
GENERATION OF HAND HELD
PORTABLE KNIFE
SHARPENERS !**

Three models to choose from

THE NEXT GENERATION SERIES I : "Bevel Buddy™"

We are continually re-inventing our tools to be better and increase your production. That is why in 2012 we are introducing three new sharpeners. They are called "Bevel Buddy™".

These next generation sharpeners can be used on even more types of knives and increase production for more knived industries than ever possible before. Some of those being: Brush chipper owners and manufacturers, equipment rental centers, municipalities, state departments, land clearing contractors, utility line maintenance contractors, horticulture, tree service contractors, pole and plywood manufacturers, and a few others as well as our existing customers.

With the lumber industries on the rebound along with the world demand for woody biofuel, wood pellets, and wood chips increasing, our sharpeners are sure to satisfy the need of our customers to keep sharp, quality product producing knives in their equipment. The use of this sharpener will improve your maintenance process while at the same time greatly decreasing your overall operating costs involved in chipping. These sharpeners work very well with disc and drum style chippers and conventional pocket style, face mounted and reversible/disposable knife systems. The use of these sharpeners will show a positive cost savings in knife steel and machinery wear parts along with increased production.

Bevel Buddy™ "MAXX" 12 VOLT Battery Lithium Ion Battery powered

This kit includes a 12 volt drive motor with universal grinding head and two drum abrasives, 2 batteries, charger, one power inverter for charger, safety glasses and storage case. This sharpener is used for disc and drum chippers from large portable machines to the largest pulp mill / wood yard machines.

~ \$729.00 U.S.D. ~

Bevel Buddy™ "MAX 120 VOLT"

This kit includes a 120 volt drive motor with universal grinding head, two drum abrasives, safety glasses and storage case. For those that prefer an electric model, this sharpener is used for disc and drum chippers from the largest pulp mill / wood yard and sawmill machines.

~ \$499.00 U.S.D. ~

Bevel Buddy™ "MAX 12 VOLT" 10' or 20' cord length available

This kit includes a 12 volt drive motor with either a 10' or 20' cord, a universal grinding head, two drum abrasives, safety glasses and a storage case. This sharpener is extremely versatile! It was designed for use on smaller disc and drum brush chippers with confined knife access areas, but is equally effective for whole tree chippers.

~ \$499.00 U.S.D. ~

Bevel Buddy™ "MAX-E 12 VOLT" 12 Volt Economy Kit.

This is a leaner version of our MAX 12 VOLT, designed with our small business owner in mind. This kit includes a 12 volt drive motor with a 10' cord, a universal grinding head, one drum or cone abrasive, and a compact storage case. It was designed for use on smaller disc and drum brush chippers with confined knife access areas.

~ \$349.00 U.S.D. ~
